Summary

Results-oriented Backend Engineer with 4+ years of experience at fast-paced startups, specializing in designing and developing scalable, robust backend systems. Proficient in Spring Boot, FastAPI, Kafka, REST APIs, databases (Postgres, MongoDB) and performance tuning

Experience

Senior Software Engineer, OnePint AI – Bangalore, India — April 2025 – Present

- **Owned and delivered** RBAC using AWS Cognito and AWS Amplify for the entire product offering.
- **Owned** the design and implementation of **Apache NiFi data integrations** with Shopify and NetSuite, forming the backbone of automated inventory and demand planning workflows.
- **Designed and developed an Inventory Simulation engine** that simulates real-time inventory usage while applying adverse scenarios.

Senior Software Engineer, Nextuple – Bangalore, India — June 2021 – April 2025

- **Owned and delivered** critical parts of the Promising and Sourcing engine(PSE) product. This product is used to find the optimal sourcing nodes to fulfill an order and find the delivery dates for it
- **Designed and developed the Cost Based Sourcing engine algorithm** that optimizes the fulfillment node for an order based on cost of delivery
- Performance tested and optimized application performance by **improving latency by 40%**.
- Developed **scalable REST standard APIs** in Spring boot with latency of up to 100ms at 250 tps load with extensive use of caching
- Developed multi-org support functionality to convert on-premises deployment product to a SaaS offering
- Wrote clean, readable and optimized code based on **OOPs principles** and well-known **design patterns**
- **Wrote Kafka Consumers and producers** for inter-service communication
- Optimized regression runs by 50% using **Junit5 tests** and **Cucumber** automation tests.

Decision Analytics Associate Intern, ZS Associates – Gurugram, India — Feb 2021 – Jun 2021

- Analysed sales force performance and recommended optimum sales force sizing and placement.

Python Developer Intern, PiChain Labs – Bangalore, India — June 2020 – August 2020

- Added aadhar e-signing and developed a notification system for e-sign app.

Education

Indian Institute of Information Technology Tiruchirappalli, BTech in Computer Science and Engineering — Aug 2017 – May 2021

- CGPA: 8.87/10.0

Projects

Storefront Website — www.mohandoodhdairy.com

- Developed a storefront website to take orders for a local milk dairy to combat customer loss due to COVID-19 situation. Tech stack: NodeJS, ExpressJS, ReactJS, MongoDB, Heroku

Cassava Disease detection — Kaggle Notebook

- Machine learning EfficientNet model to diagnose Cassava diseases. Accuracy: 91%.

Technologies

Languages: Java, C, Python, SQL, JavaScript

Software: Spring boot, Kafka, JUnit5, FastAPI, React, PostgreSQL, MongoDB
